## Financial and Operational Highlights

- Q3 2016 generation in line with budget
- Significant increase (Q2 2016 to Q3 2016) in the long term power price forecast, primarily reflecting post Brexit exchange rate movements, leading to an increase in NAV per share of approximately 3p
- Total gearing 27% of GAV (all at Company level)
- Dividend of 1.585p per share in respect of Q2 2016 paid on 26 Aug 2016

## Investment Objective

The Company's aim is to provide investors with an annual dividend that increases in line with RPI inflation (6.34p for 2016) while preserving the capital value of its investment portfolio in the long term on a real basis through reinvestment of excess cashflow and the prudent use of portfolio leverage.

## Investment Policy

- The Company intends to increase its portfolio of wind farm investments. Key investment criteria include:
- The substantial majority of the portfolio will be operating UK wind farm projects (predominantly with a capacity over 10MW)
  - The portfolio will be invested in both onshore and offshore wind farms, with the amount invested in offshore wind farms being capped at 40% of GAV at acquisition
  - The Company intends to retain exposure to UK power prices by entering into Power Purchase Agreements ("PPAs") that avoid fixing the price of power
  - The Company will generally avoid using non-recourse debt at the asset level; total short term acquisition financing and long term debt at Company level will not be more than 40% of GAV at drawdown

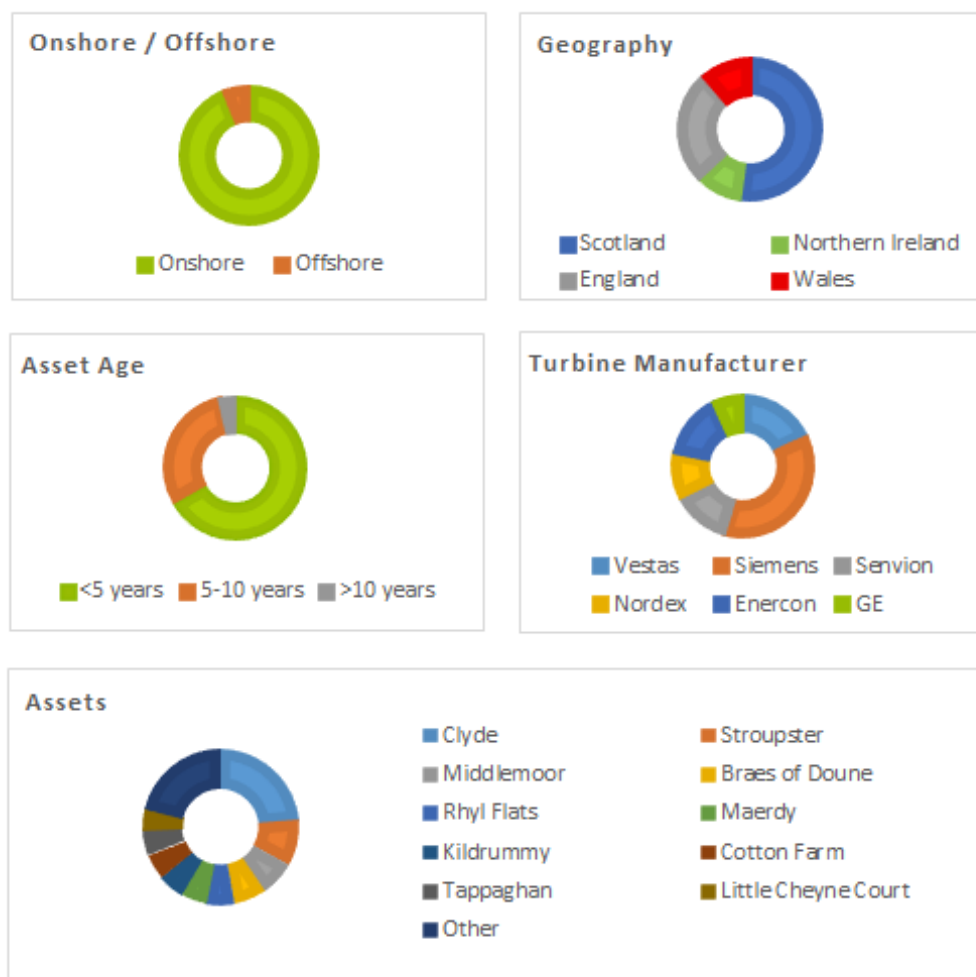

## September 2016 Factsheet

### Portfolio

The Portfolio consists of interests in 19 operating UK wind farms, with an aggregate net installed capacity of 420MW. Key characteristics of the Portfolio:
