Investment Objective

The Company's aim is to provide investors with an annual dividend that increases in line with RPI inflation (7.1p with respect to 2020) while preserving the capital value of its investment portfolio in the long term on a real basis through reinvestment of excess cashflow and the prudent use of gearing.

Investment Policy

- The substantial majority of the portfolio will be operating UK wind farms
- The portfolio will be invested in both onshore and offshore wind farms, with the amount invested in offshore wind farms being capped at 40% of GAV at acquisition
- The Company will generally avoid using non-recourse debt at wind farm level; total short term acquisition financing and long term debt at Company level will not exceed 40% of GAV at drawdown
